I must readjust my def as per en dir of attk.
g.	En will be able to contact fwd line of my bunkers by 2300 hrs and may be able to gain foot hold by capturing indl LMG bunkers.	I must engage the en with all aval fire once it is aslt through M fds and try to break up the aslt before en reaches my bunker loc. Failing which, I must demand from my coy comds to react aggressively to en pen and launch local C attks, if not possible, than coys must readjust to contain en pen.
h.	By mid ni, en will be able expand its foothold secured into my FDLs by capturing sec / two secs size locs. At this time en tps will be vuln and low on ammo and without any hy wpns.	I must judge en main attk and launch imed C attk from depth coys. If I fail to launch C attk within earlier time frame, than I should occupy C pen posn and try to resist en efforts to expand further.
